Your print-out is the right size.
• shrink to fit for printing.

Use target marks to align A4 printouts

Measure that this line is exactly 30cm to confirm
Make sure your printer does not resize or

172.4mm

Assemble the Chart:

1. Print all pages. Ensure the printer does not resize, scale or shrink to fit the page. Make sure the printer is set to print the page orientation as landscape.

2. Cut off the top of Page 2 along the dotted horizontal line.

3. Place the top of Page 2 over the bottom of Page 1 and align the pages using the target marks. The target lines should match up horizontally and vertically. Once in place, use sticky tape to keep them in place.

4. Using a ruler, measure the line to the left from arrow tip to tip. It should be exactly 30cm. If the actual length of the line is not exactly 30cm, then something has gone wrong with the printing, cutting or aligning process. Try again.

5. Place on the ground, on a hard, flat surface. Step on the chart.

6. Using a vertical pen, trace around the outside of your foot.

7. Scan or take a clear photo of the completed page and upload it on the "Size" webpage as part of your order, or email it to us at size@veinwear.com.
